Date: 06 January 2022

Dear Customer,

There are inquiries from customers on the European REACH regulations, Registration, Evaluations, Authorization and Restrictions of Chemicals. Under this regulation, chemicals being imported to Europe at 1 tonner per year or more will need to be registered through the European Chemical Agency (ECHA).

Additive Circuits (S) Pte Ltd, a manufacturer of Bare Printed Circuit Boards (PCBs), a non-chemical product and under normal conditions will not release any harmful substance, does not require to register to European Chemical Agency, as the product that we sold to our customers are considered articles, based on REACH directive Section 3 no. 3.

Additive Circuits (S) Pte Ltd, further certifies that our product, PCBs does not contain any of the substances on the Candidate List of Substances of Very High Concern (SVHC). ACS is committed to ensure environmental compliance globally and will continue to stay informed of the changes to the REACH directive and comply as necessary and we also make sure to be compliant with other EU legislations such as RoHS.

More information about REACH can be found on the ECHA website, including the guidance document and articles: [Understanding REACH - ECHA \(europa.eu\)](http://europa.eu)

Regards,

Michael Yeo
Operations Manager
